CHRONOBIOLOGIA

ORGAN OF THE INTERNATIONAL SOCIETY
for
CHRONOBIOLOGY

VOLUME VI 1979

INDEX OF CONTENTS

ORIGINAL PAPERS

T. K. Banerji, T. Kachi, W. B. Quay: Circadian changes in adrenal dopamine-β-hydroxylase activity: dependency of change at darkness onset, and the effect of pinealectomy, on animal strain and age 1

J. Vaillier M. Donner: Oscillatory nature of DNA, RNA, protein and lipid metabolisms in antigen-stimulated lymphocytes 9

A. Besset, A. Bonardet, M. Billiard, B. Descomps, A. Craste de Paulet, P. Passouant: Circadian patterns of growth hormone and cortisol secretions in narcoleptic patients . . 19

B. Jilge: The entrainment of caecotrophy-rhythm of the rabbit following 6- and 12-h phase-shifts of the *Zeitgeber* 33

T. H. Tsai, R. E. Burns, L. E. Scheving: Circadian influence on the immunization of mice with live bacillus Calmette-Guérin (BCG) and subsequent challenge with Ehrlich ascites carcinoma 187

F. Halberg, W. Nelson, G. Cornélissen, E. Haus, L. E. Scheving, R. A. Good: Chrono-chemotherapy: L 1210 leukemia and beyond 203

C. Hyver, S. Jerebzoff, V. H. Nguyen: An attempt to establish a model for the rhythmic phenomena affecting the growth or sporulation of certain fungi 213

W. Nelson, Y. L. Tong, J.-K. Lee, F. Halberg: Methods for cosinor-rhythmometry . . 305

SATELLITE MEETING
XIII INTERNATIONAL CONFERENCE OF I.S.C., *Milano*, Italy

D. De Maio: Introductory remarks 363

D. F. Kripke, D. T. Mullaney, M. L. Atkinson, L. Y. Huey, B. Hubbard: Circadian rhythm phases in affective illnesses 365

T. Wehr, F. K. Goodwin: Tricyclics modulate frequency of mood cycles 377

G. Trapp, E. D. Eckert, P. Vestergaard, R. B. Sothern, F. Halberg: Psychophysiologic circadian rhythmometry on manic-depressive twins 387

R. B. Sothern, F. Halberg, W. Nelson: Strain difference in circadian murine chronotolerance to the antidepressant drug nomifensine 397

F. Halberg, W. A. Lubanovic, R. B. Sothern, B. Brockway, E. W. Powell, R. N. Pasley, L. E. Scheving: Nomifensine chronopharmacology, schedule shifts and circadian temperature rhythms in di-suprachiasmatically lesioned rats, modeling emotional chronopathology and chronotherapy 405

XIV INTERNATIONAL CONFERENCE OF THE INTERNATIONAL SOCIETY FOR CHRONOBIOLOGY

Abstracts 69

REVIEW

E. Halberg, F. Halberg, G. Cornélissen, M. Garcia-Sainz, H. W. Simpson, M. A. Taggett-Anderson, E. Haus: Toward a chronopsy: Part II. A thermopsy revealing asymmetrical circadian variation in surface temperature of human female breasts and related studies 231

NEWS

BOOK REVIEW

Chronopharmacology 327

FROM MEETINGS

Reports

First chronobiological course, L'Aquila, *Italy* 181
Naito International Symposium on 'Biorhythm and its central mechanism', Tokyo, Japan 328

Announcements

Presentation of a school supported by NATO 41
VI Refresher Training Course of Medical Oncology, Cagliari, Italy 261
First Course of Sensitization to Psychosomatic Medicine, *Milano*, Italy 335
R.I.A. '80, *Gardone Riviera, Brescia*, Italy 335
Vth International Symposium on Night- and Shift-work, Rouen, France 336

Programs

XIV International Conference of the International Society for Chronobiology, Hannover, 1979 42
Quality Control in Clinical Endocrinology, Cardiff, Wales, U.K. 262
XIII National Congress of the *Associazione Italiana di Radiobiologia Medica*, Firenze, Italy 263
Third Conference of the Indian Society for Chronobiology, Varanasi, India 264

Third International Colloquium on Physical and Chemical Information Transfer in Regulation of Reproduction (PCITRRA), Varna, Bulgaria 264

First African and Mediterranean Congress of Clinical Chemistry, *Milano*, Italy 265

Biological adaptation, Marburg, West Germany 337

Abstracts

M. A. Taggett Anderson, G. Cornélissen, F. Halberg, H. Simpson, M. Turbit, K. Griffiths: Circadian-circatrigintan mammary thermopsy before a biopsy 43

E. Haus, F. Halberg, W. Nelson, D. J. Lakatua, T. Kawasaki, M. Ueno, K. Uezono, T. Omae: Age effects upon circadian amplitude in a concomitant study of 12 hormones in plasma of women 266

W. Babb, L. Sackett, T. Tuason, J. Swoyer, E. Haus: Circadian bioperiodicity in ^{3}H-thymidine uptake in BDF_1 mouse testis in relation to reference functions 266

D. J. Lakatua, K. Labrosse, E. Haus, L. Sackett, F. Halberg: Circadian periodicity on sex hormone receptor activity in BALB/c mice 267

P. Ernsberger, S. Azar, S. Livingstone, J. Iwai, F. Halberg: Strain difference in mesor of circadian rhythmic urinary kallikrein excretion and in adjustment to dietary salt loading of DAHL rats 338

PERSONALS

New chronobiologic units 44

Dr. Yoshihiko Chiba 278

Prof. Noubar Aslanian 279

SOCIAL ACTIVITIES

International Society for Chronobiology

Chronobiology and its relation to developing a knowledge base for regulatory decisions in health and prevention 45

Chronobiology Award 1979 268

Nato Advanced Study Institute in Chronobiology, Hannover, B.R.D. 270

LITERATURE INDEX 55, 281, 339

INDEX 1979

SUBJECT INDEX: 1979 (Vol. VI)

Numbers in normal type refer to subjects found in Position Papers, Original Papers, Reviews and Historica.

Numbers in *italic type* refer to subjects found in Reports from Meetings, Book Reviews and New Articles.

A

Accidents 77
Acetaldehyde 176
Acid-β-galactosidase 102
— phosphatase 102, 112
Acrophase 116, 156, 158, 305
— advance 108
ACPase 166
Activity 88, 133, 160, 165, 170, 365
general — 97
LD proportion of — 97
Adaptation 81, 111, 154
— processes 85
Adenosine triphosphatase 137
Adenylate kinase 87, 137
Adrenal 136, 159, 151
— cortex 104
— cortical cycle 106
— gland 1
Adrenalectomy 71
Adrenergic dominance 158
Adrenopituitary axis 121
Adriamycin 143, 153
Adults (males and females) 96
Adjective checklist 75
Affective diseases 93
African vervets 131
Age 91, 97, 101, 147, 150, 172
— at mastectomy 157
— changes 1
— effects *266*
influence of — 1
— related changes 123
Aging 73, 125, 164, 170
Alanine-amino-peptidase (AAP) . . . 112
Alcohol dehydrogenase 137
Alcoholism 176
Aldolase 87, 137
Aldosterone 75, 88, 116, 177
Alert 128
Alertness 158
Allesthesia 76
Allograft 116
Altitude
high — 110
Alveolar air 108
Amphetamine *47*
Ampicillin 156
Amplitude 109, 116, 125, 158, 305
double — 138
— increase 108
— modulation 81
Analgesic *placebos* 145
Angiotensin II 90
Animex 120
Annual fish 130
ANOVA 92
Antiphase 162
Ara-C 203
Arcuate nucleus 148

Arylsulphatase A (ASA) 112, 166
Assimilation 115
Asymmetry 231
Atherosclerosis 162
Atmospheric pressure 98
Audiogenic seizures 110
Audition 118, 170
Autonomic rhythm 158
Autophasing 82
Autorhythmometry . . *50*, 96, 119, 121, 148
Auxin 167
Availability 129

B

Bacillus Calmette-Guérin (BCG) . . . 187
Bats 129
B cell 71
Behavior 101, 144
Behavioral interactions 170
Belousov-Zhabotinsky reaction . . . 121
β-glucuronidase 79, 102, 112, 166
Bifurcation 106
Binucleated cells 149
Biological clock 94
Biological oscillations 106
Bioperiodicity 172
Biopsy *43*
Bisinusoidal analysis 136
Blaps gigas L. 120
Blind 135
Blood 151, 203
— alcohol concentrations 176
arterial — pressure *51*
— coagulation time 85
— ethanol clearance rates 160
peripheral — 71
— pressure . . . 88, 100, 105, 135, 148
— pressure rhythms 101
red — cells (RBC) 142
red — cell — ghosts 142
— sedimentation rate 85
— serum levels 134
Blowfly 150
Bone injury 157
Bovine serum albumin (BSA) 9
Bowel movement 150
Brain 124, 126
Breast surface temperature 161
Bromocriptin 140

C

cAMP 104, 154
Caecotrophy 33, 112, 114
Caecum 88, 112, 153
Calcium 110, 157, 172
Cancer 77, 123, 203, 147, 157
breast — 123, 142
chronotherapy of — 117, 127
Carbohydrate metabolism 85, 99
Carcinogenesis *267*
Carcinoma 83
metastatic — 113
Cardiac
— arrhythmias 81
— rhythm 146
Cartilages 139
Cat 128
Catecholamines . . . 100, 120, 151, 166
Cavernicolous animals 125
Causes of death 77
Cell
— clock mechanism 155
— cycle 94, 138
— cycle phase duration 163
— division rate *46*
— mediated immunity 146
— membrane 142
Cellular kinetics 77
Cerebrovascular diseases 77
cGMP 104
Chalone 124
Chaotic regimes 106
Chemical plant 90
Chickens 160
Chlamydomonas reinhardii . . 111, 132, 138
Chloride 116
Cholinergic dominance 158
Chronobioavailability 156
Chronobiology 120
— course *183*
— in health and prevention *45*
Chronobiotic 377
Chronochemotherapy 203

Chronodesm 108
Chronoepidemiology 142
Chronohygiene 75

Chronopharmacokinetics 113
— — of cisdiamminedichloroplatinum . 113
— — of digitalis 87
Chronopharmacology 83, 106, 107, 127, 143, 397, 405
Chronopharmacotherapy 81
Chronopathology *338*, 405
Chronoprotopathology 172
Chronopsy 231
Chronopsychology 145
Chronorisk 108, 162
Chronotherapy . . . 77, 105, 113, 144, 405
cancer — 80, 117
Chronotolerance 80, 117, 397
Circadian adjustment following rapid transmeridian flight 91
Circadian amplitude 74
— — of catecholamine excretion . . 125
— — of hormonal rhythms *266*
Circadian aspects of the teratogenicity of cytostatic drugs 152
Circadian bioperiodicity in NKCA of human blood 172
Circadian changes 1, 80, 81
Circadian clock 132
Circadian dyschronism 133
— — of telemetered core temperature 116
Circadian ecphasia 86
Circadian fluctuations of enzymes . . . 137
Circadian oscillations of core temperature 94
Circadian pacemakers 76
Circadian patterns
— — of activity 97
— — of blood pressure 148
— — of cortisol secretion 19
— — of electrolyte excretion . . . 121
— — of growth hormone 19
Circadian periodicity
— — in ^{3}H-thymidine uptake . . . 266
— — of heart rate of *Cyprinus carpio* 156
— — of memory processes in man . . 145
— — of plasma 17-OHCS in rabbits 157
— — on sex hormone receptor activity 267
Circadian phase adjustment to time zones 102
Circadian phase position 81, 118
Circadian rhythm 19, 33, 43, 71, 72, 74, 76, 77, 78, 81, 82, 84, 85, 86, 87, 88, 92, 93, 95, 100, 114, 118, 119, 121, 124, 127, 132, 142, 151, 153, 154, 160, 162, 166, 170, 174, 203, 387
— activity — 159
— activity — in hamsters 165
— activity — of rats 88
— — and human memory 98
— and seasonal rhythm of β-glucuronidase 79
— blood pressure — 105
— core temperature — 127, 158
— — desynchronization 169
estimation of — — 130
free-running — — 111
human — — . . . 170, 171, 173, 176
— — in antigen recognition 146
— — in bats 129
— — in behavior 144
— — in C3 139
— — in CP chronotolerance 117
— — in corticoadrenal cyclic nucleotides (cAMP and cGMP) 104
— — in cortisol dehydroepiandrosterone, Δ-4-androstenedione, testosterone and dihydrotestosterone 104
— — in eating behavior in the female domestic fowl 132
— — in human nerve conduction velocity 97
— — in mammals 142, 161
— — in rodents 122
— — in sleep parameters 72
— — in the activities of 3 lysosomal hydrolases 102
— — in the blowfly *Phormia teraenovae* 150
— — in the growth rate of the condylar and epiphyseal cartilage 139
— — in the kidney 92
— — in the mammary gland response to prolactin 82
— — in the rat 159
— — in total serum proteins . . . 164
— — in urinary volume, glucose, and potassium 73
— — in urinary water and solute excretion 83
neuronal — — 103
non 24-h — — 135
— — of alertness 135

— — of an erythromycin resistant strain of *Chlamydomonas reinhardii* 138
— — of binuclear rat liver cells . . . 149
— — of body temperature . . . 115, 135
— — of body temperature and activation 96
— — of DNA concentration in rat liver 71
— — of electrical potential difference (PD) in rabbits . . 88
— — of enzymes in the rat gastric mucosa 174, 175
— — of external pH and photosynthesis in *Chlamidomonas reinhardii* . . 111
— — of faecal NA/K ratio in rabbits 88
— — of free T3 (FT3) and free T4 (FT4) 92
— — of human alveolar air isoprene 108
— — of interprandial exogenous insulin 134
— — of intestinal mucopolysaccharides 79
— — of mitotic activity in the corneal epithelium of the mouse 145
— — of 11-OHCS in blood of rats . . 119
— — of *placebo* reaction 145
— — of plasma aldosterone (PA) in rabbits 88
— — of plasma corticosterone and locomotor activity 111
— — of plasma cortisol 135
— — of plasma renin activity, aldosterone and cortisol levels 75
— — of plasma triglycerides 131
— — of rat gastric parietal cells . . . 175
— — of salivary pH 158
— — of shift workers 95
— — of skin temperature 107
— — of spheno-occipital synchondrosis in rats 160
— — of task performance 135
— — of the erythropoietic system . . 110
— — of urinary calcium, phosphorus, magnesium, creatinine and uric acid 157
— — of urinary electrolytes . . . 79, 135
— — of urinary enzyme excretion . . 112
— — of urinary potassium and corticosteroid excretion . . . 177
— — phases in affective illnesses . . 365
physiological — — 101, 135
protein — — in the rat adrenal and testes 136
psychological — — 135
— rest-activity — 169
serum PRL — — 96
— temperature — 105, 405
Circadian rhythmicity 155
— — in food intake 147, 148
— — of cell division and aminoacid transport 94
— — of motor activity, heart rate and body temperature 143
Circadian rhythmometry of adenosine deaminase 164
Circadian spectral domain 93
Circadian stages different — — . . . 48
Circadian system 81
— — of the mouse 187
Circadian toxicity of cytostatic drugs . . 73
Circadian types 101
Circadian variations 101
— — in carbohydrate metabolism . . 99
— — in hormonal control of serum glucose and glycogen metabolism in mice 99
— — in long term erythropoietic reaction 110
— — in mitosis in the mouse corneal epithelium 149
— — in pharmacokinetics parameters after oral application of hexobarbital 73
— — in surface temperature of human female breasts 231
— — in the intraocular pressure of glaucomatous patients 87
— — in the morphology and histochemistry of gastric mucosa 114
— — in the proliferative activity in squamous epithelia 163
— — of activity of thiamine pyrophosphatase in rat liver parenchymal cells 167
— — of enzymes in man and rats . . 87
— — of human and mouse lymphocytes 71
— — of mating and conception in mice 151
— — of serum chemistry parameters 92
— — of serum digitalis level values after 3H-β-methyldigoxin administration 87
— — of serum prolactin and TSH of women 83
— — of systolic time intervals in cardiac patients 84
— — of the effect of physical training 77
— — of thermal comfort during work 76

Circannual 79, 117, 123, 142
— rhythm in serum prolactin . . . 138
— rhythm in TIBC 138
— rhythm temperature 156
— variations in carbohydrate metabolism 99
— variations in reproduction of *Rhesus* monkey 171
— variations in the intraocular pressure of glaucomatous patients 87
